Discover NX Lighting Controls

NX Lighting Controls delivers a fully distributed system of connected devices, sensors, and luminaires that deliver easy to design and install solutions to meet building code and reduce energy costs. Scale the system from basic lighting control at the luminaire or room level to a complete building or fully networked site with seamless integration of interior and exterior spaces. NX Lighting Controls provides a digital network for wired, wireless, and hybrid connectivity with device auto-configuration for out-of-the-box operation with mobile app for simple configuration and enterprise software to enable additional operational benefits.

System Overview

ONE SYSTEM WIRED AND WIRELESS

Inside and Out

INDOOR & OUTDOOR DEPLOYMENT

Single System for any commercial site spanning indoor and outdoor applications

CONNECTED LIGHTING PORTFOLIO

Broad offering of NX Enabled Luminaires that simplify installation and system costs

INTELLIGENCE IS IN OUR DNA

Utilizes a Distributed Network Architecture (DNA) to eliminate single point of failure to deliver unmatched reliability and scalability

SITE MANAGEMENT

NX Network provides single user interface for system maintenance and configuration

BUILDING INTEGRATION

The NX system is BTL certified ensuring a seamless experience with existing building management systems

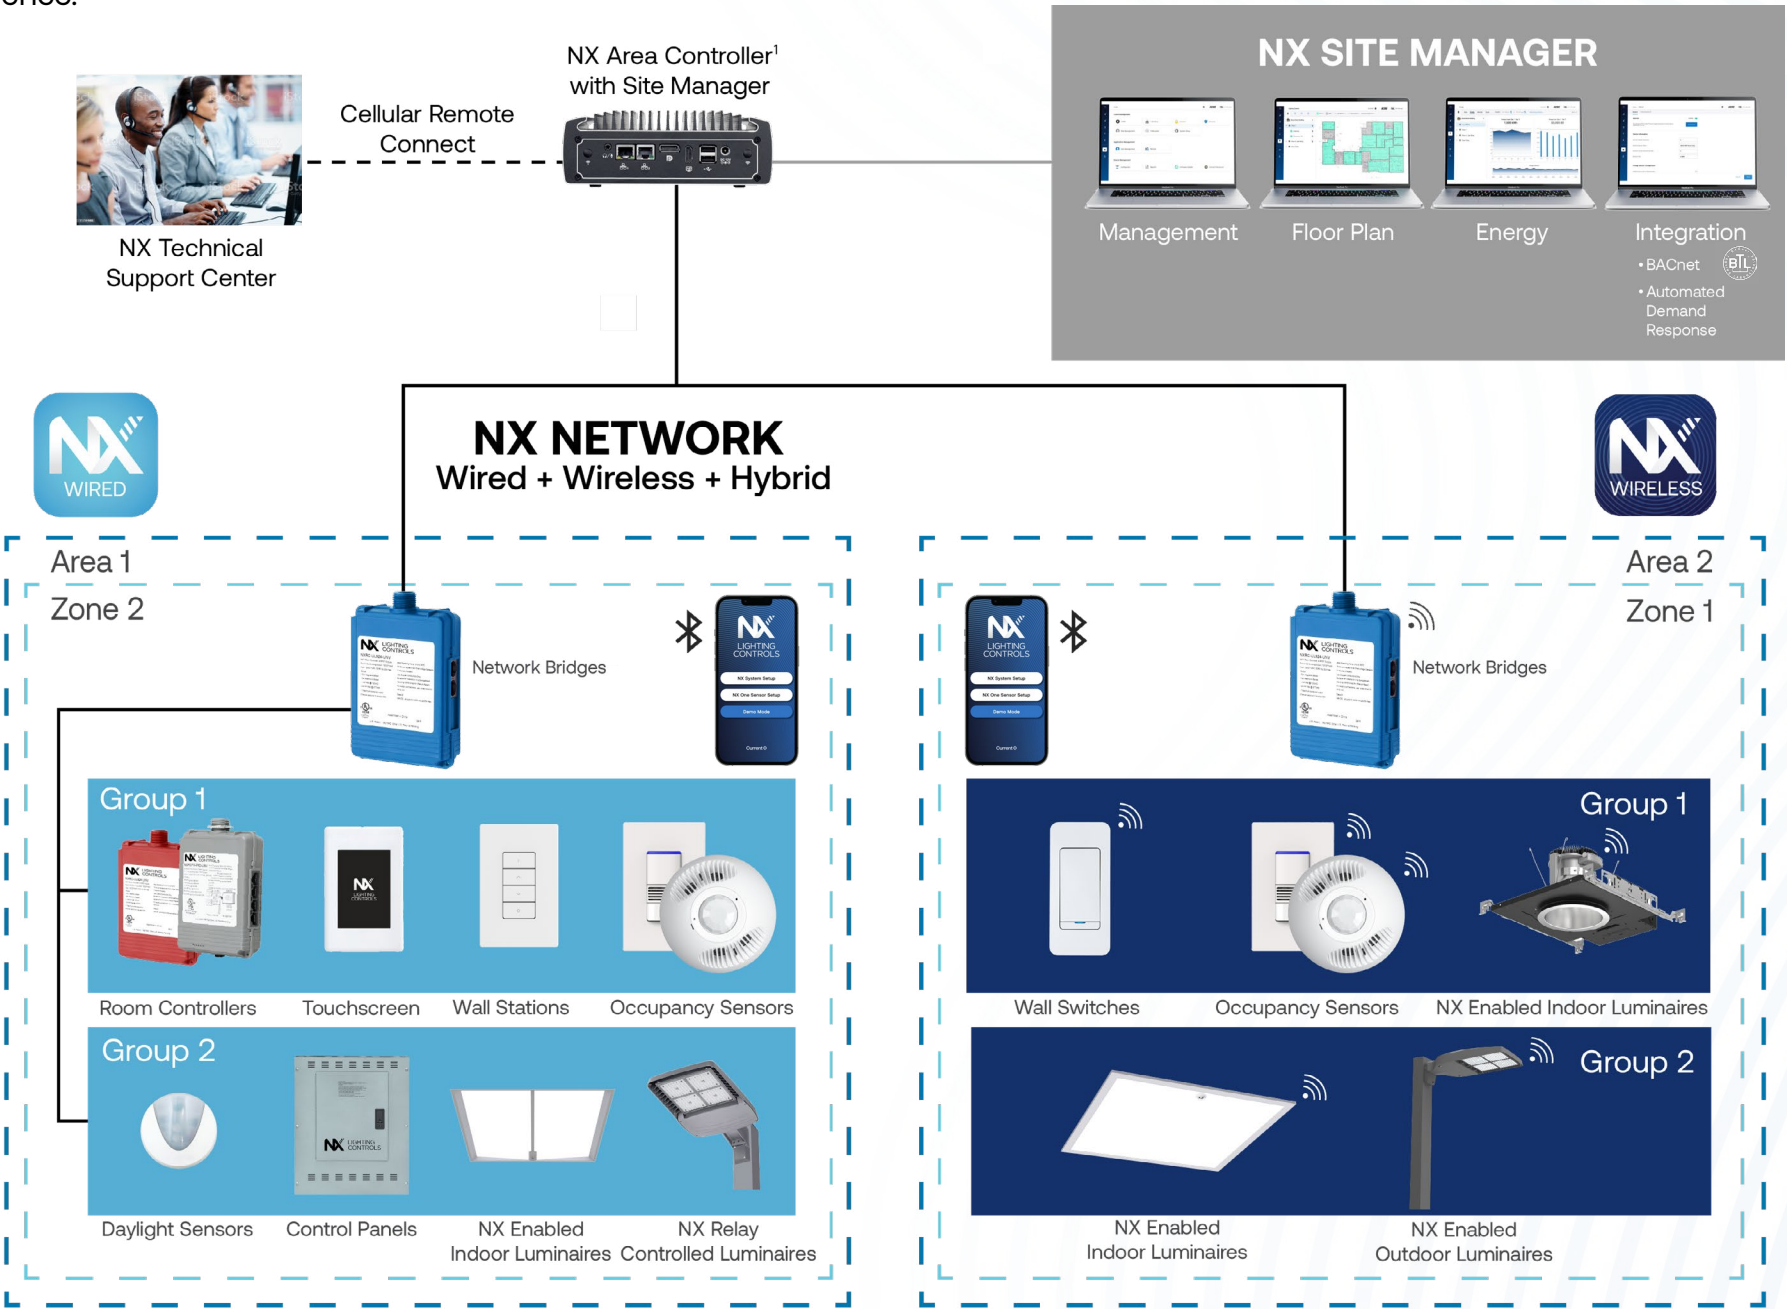

Building Blocks

NX System Overview

The NX Lighting Controls System provides all the building blocks necessary for a secure, on-premise enterprise lighting management system. The system not only controls lighting, but also provides actionable information to Building Owners and Facility Managers to create energy efficient spaces and improve occupant experience.

NX LIGHTING CONTROL SYSTEM

- Network of device and luminaires organized by Areas / Zones / Groups (AZG)
- NX wired & wireless devices and connected luminaires control lighting using relays and 0-10V dimming
- Wired devices connect using CAT5 cables and provide auto-configuration for basic code compliance
- Wireless devices are grouped together and communicate using secure AES 128-bit encrypted 2.4GHz wireless mesh technology based on the IEEE 802.15.4 standard. Network bridges manage NX Zones and connect wired and wireless zones to the NX Network
- NX Lighting Controls mobile app provides simple tool for quick device and system adjustments
- The NX Area Controller with Site Manager provides Building Owners & Facility Managers with multi-building lighting control, insights into their lighting system, and integration with Building Management Systems (BMS)

SITE MANAGER

- Intuitive web-based, comprehensive lighting management console
- Visual insights into energy usage
- Manage lighting schedules
- Quickly respond to requests for light level changes or reported issues from floor plan views
- Integrate the lighting system to any BACnet compatible Building Management System (BMS)

Room Control

Wired Solution

The NX Lighting Controls wired room control is a fully distributed digital lighting control solution for standalone and networked applications. With a plug-and-play auto-configuration feature using CAT5 connections NX delivers a quick and simple means to reduce installation time, meet code, and enable manual, daylight or scheduled based control at the room level.

NX
Wall Switch

NX OMNI
Ceiling Sensor

NX Room Controller

ROOM CONTROLLERS

- Real-time clock for scheduling at room control level
- Power metering
- Intelligent auto-configuration with device automatic code compliance
- CAT5 plug-and-play connectivity
- UL924 emergency solutions

WALL SWITCHES

- Clean, unobtrusive & enduring design
- Smart Switches available in 1, 2, 3, 4, 5, 6, 8, and key switch versions
- Specialty versions available for out-of-box programming
- Offered in White, Gray, Black, Ivory, Light Almond, and Red
- Custom laser engraved buttons available for NX Smart Switches
- NX SimpleTouch single gang touch screen

SENSORS

- Passive Infrared, Ultrasonic & Dual Technology
- CAT5 plug-and-play connectivity
- Integrated 2.4GHz wireless mesh and bluetooth radio for easy commissioning & communication
- IntelliSCOPE™ compatible for real-time sensitivity reading and adjustment
- Indoor and outdoor daylight sensors

INTERFACES

- Allow third party devices to digitally interface with the NX System
- Supports RS232 serial communications
- Supports A/V, dry contact outputs & inputs as well as HVAC options
- Enables Bluetooth commissioning with real-time clock option
- Wireless Radio interface with 2.4GHz mesh capabilities for NX Network communication

NXP2 Panel

Wired Solution

The NX Lighting Control Panel (NXP2 Series) is a robust and reliable panel that can operate as a standalone or networked NX solution. The NX Panel meets all applicable code and energy requirements, is fully scalable, quick to install, and easy to program from the NX Lighting Controls mobile app.

LIGHTING CONTROL PANELS

- Available in 8, 16, 24, 32 and 48 relay panel sizes
- Matching number of relays and dimming channels
- Programmable using Bluetooth® NX Lighting Controls mobile app using NXBTC (included)
- Optional factory installed UL924 emergency control
- Contractor friendly installation and configuration

RELAYS

- Robust mechanically latching single and double pole relays
- Electrically rated for 60,000+ operations (30,000+ cycles) at full 20A load
- Mechanically rated for 120,000+ operations (60,000+ cycles)
- Manual override switch integral to relay
- At-A-Glance ON/OFF relay status indicator

WALL SWITCHES

- Clean, unobtrusive & enduring design
- Smart Switches available in 1, 2, 3, 4, 5, 6, 8, and key switch versions
- Specialty versions available for out-of-box programming
- Offered in White, Gray, Black, Ivory, Light Almond, and Red
- Custom laser engraved buttons available for NX Smart Switches
- NX SimpleTouch single gang touch screen

SENSORS

- Passive Infrared, Ultrasonic & Dual Technology
- CAT5 plug-and-play connectivity
- Integrated 2.4GHz wireless mesh and bluetooth radio for easy commissioning & communication
- IntelliSCOPE™ compatible for real-time sensitivity reading and adjustment
- Indoor and outdoor daylight sensors

Single & Multiple Panel Configurations

Networked Panel Deployment

Connected Lighting - Indoor

Wireless and Wired Solutions

NX Lighting Controls offers a broad portfolio of wireless control devices and enabled luminaires to create seamless scalable solutions from a single room to a complete networked campus. With the removal of wires and simple programming through mobile app or enterprise software, NX Wireless delivers design simplicity, reduced installation time and low-cost code compliance for both retrofit and new construction.

**DOWNLIGHTS
& CYLINDERS**

LINEAR

TROFFERS & PANELS

STRIPS & WRAPS

RETROFIT KITS

HIGH BAYS

SENSORS

- Multiple form factors and coverage patterns for integrated sensors
- Room Control sensors can seamlessly connect with NX enabled Luminaires

INTEGRATED SOLUTIONS

- Integrated Radio Module provides wireless connectivity for NX Devices to the NX Network
- Dual SmartPORT adapters allow for wired CAT5 connection of NX enabled Luminaires

WALL SWITCHES

- Battery Operated Wireless Rocker Switch
- Programmable to multiple switch types

Connected Lighting - Outdoor

Wireless Solutions

NX Lighting Controls offers a broad portfolio of wireless control devices and NX enabled luminaires to deliver a scalable solution to support a variety of outdoor standalone and networked applications. With the removal of wires and simple programming through mobile app or enterprise software, NX Wireless provides a cost-effective install with multiple integrated control methods to comply with code and reduce energy costs.

SITE & AREA

BOLLARD

FLOOD & WALL
MOUNT

CANOPY & GARAGE

SENSORS

- Multiple form factors and coverage patterns for integrated sensors
- IP65 rated versions for outdoor applications

INTEGRATED SOLUTIONS

- Integrated Radio Module provides wireless connectivity for NX Devices to the NX Network
- The NX 7-pin On-Fixture Module provides a single pole relay, 0-10V connection, Bluetooth® radio, and wireless 2.4GHz radio in a single package

Mobile App

Discovery and Programming App

The NX Lighting Controls mobile app helps provide quick, simple installation, and programming right in the palm of your hand.

The NX Lighting Controls mobile app is a free to use mobile application for programming both an NX Lighting Controls System or Standalone Bluetooth Sensors. The app allows you to discover and configure wired and wireless devices and setup groups and zones for both standalone and networked NX sites. The app also provides access to IntelliSCOPE™ for real time occupancy data with any digital NX or standalone Bluetooth sensor. The NX Lighting Controls mobile app is available for download on both Apple iOS and Android devices.

- Enables easy setup, configuration and diagnostics of standalone Bluetooth sensors, NX room devices and NXP2 lighting control panels via Bluetooth BLE
- Create custom holidays, schedules, and presets (lighting scenes)
- Set geographical location of site for sunrise/sunset schedules
- Simple configuration of relay and dimmer settings for selected areas and zones
- Passcode protected to prevent unauthorized access to system
- Supports OTA (Over The Air) device updates
- Features IntelliSCOPE™ diagnostic tool for real-time calibration and testing of NX digital smart sensors

All NX wireless sensors come enabled with our proprietary IntelliSCOPE™ functionality, which provides true ladder-less programming and installation all with the click of a button. IntelliSCOPE™ provides real-time occupancy data to help optimize sensor detection in any application, which helps save time and money.

NX Networking

Building and Site Networking

The NX Networked devices provide a simplistic approach to networked lighting controls that are cost-effective and flexible for diverse applications. NX Network devices seamlessly connect across both indoor and outdoor applications through wired, wireless, or hybrid deployments.

NX AREA CONTROLLER

- On-premise solid state controller with Intel I7 CPU, 16GB Memory, and 500GB SSD
- Multi-layer network security and access control (IoT Certified)
- Integrates NX Lighting Control System with Building Management Systems (BMS) via BACnet IP interface (BTL Listed)
- Integrated remote connection provides access to NX customer support team assistance
- Supports up to 1,000 NX devices
- DIN rail mounting (DIN rail kit included)

NX BRIDGE

- Connects individual Zone Segments to main NX Network Segment
- Serves as a repeater to extend the NX Network Segment
- Connects Wired and Wireless Zones
- Multiple bridges can be connected to extend the number of devices in a Zone Segment
- Built-in time clock keeps zone devices and schedules synchronized

POE SWITCH

- Expands NX Network into 7 segments
- Each port is powered and can supply DC power to connected NX Bridges
- 24V AC/DC power supply included

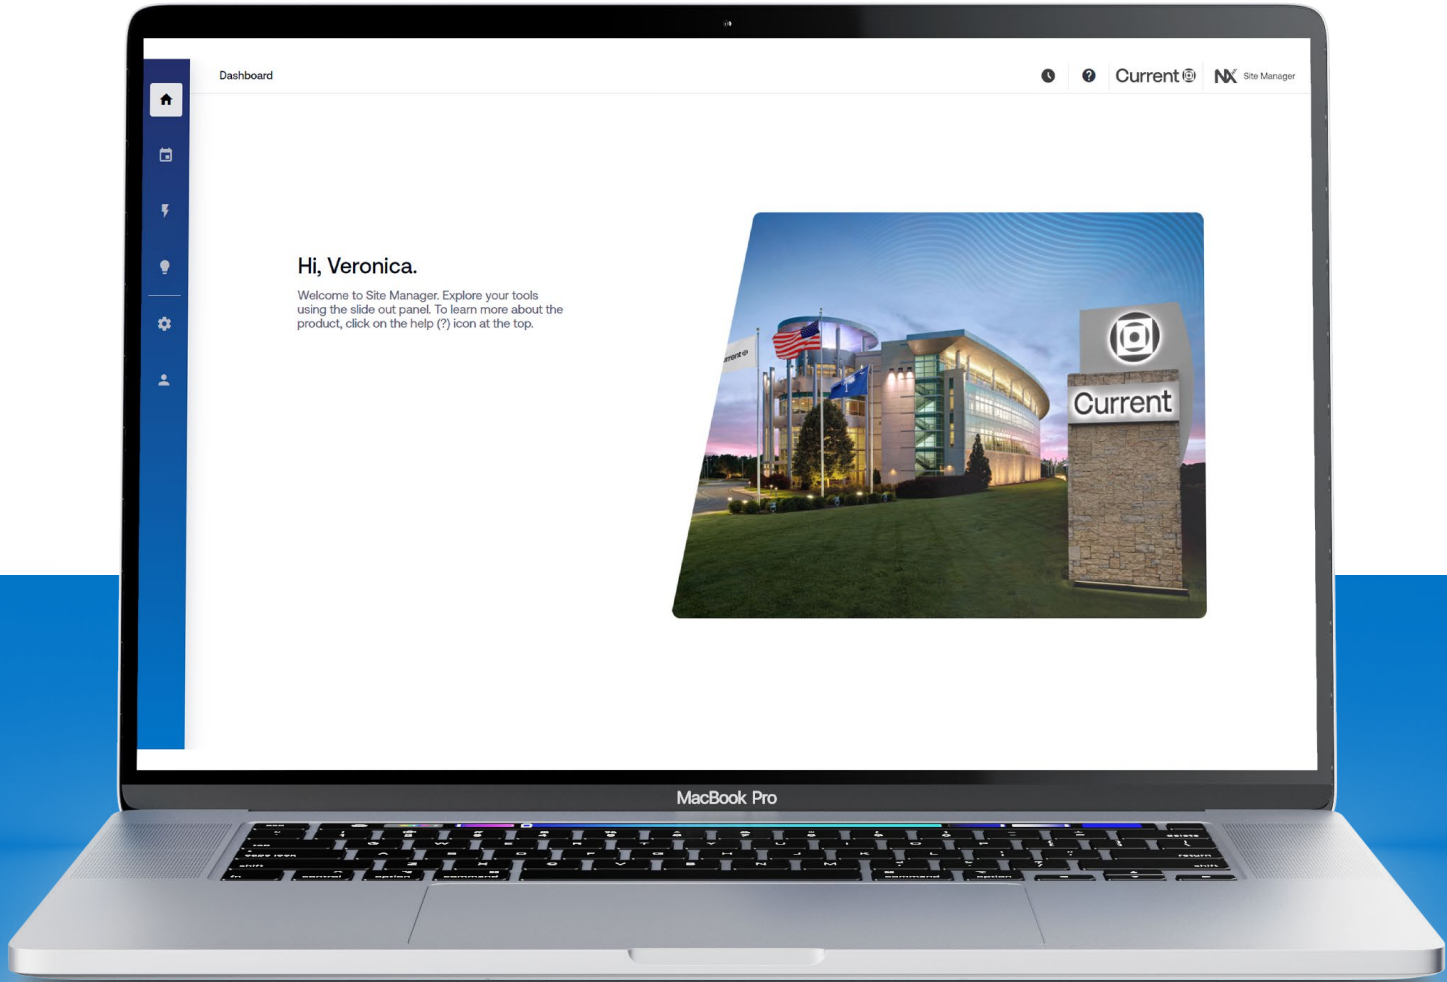

MEDIA CONVERTER

- Provides ability to extend NX Network across large distances (up to 5km between media converter devices)
- Enables NX Network to span separate buildings with different ground planes
- Multi-mode operation supports copper CAT5 and fiber connections

Site Manager

On-premises Enterprise Software Platform

NX Site Manager is a web-based application for the NX Lighting Control System providing multiple modes of operation, improved facility, user, and device management. It also features facility-wide view of schedules, system reports and the ability to configure multiple OpenADR 2.0a/2.0b Demand Response levels. In addition, NX Site Manager provides optional features including zone status and control via floor plans and energy dashboard for improved operational efficiencies.

INTUITIVE USER INTERFACE

- Real-time programming & management of the NX Lighting Control System
- Commissioning & Facility Manager modes
- Supports multiple operations being performed simultaneously

USER MANAGEMENT

- Create user roles (e.g. System Admin, Facility Manager, General User)
- Specify role permissions and assign areas of responsibility
- Add users, assign roles & permissions, activate & lock user accounts, or delete user accounts

FACILITY SCHEDULE

- View/modify all zone schedules across a facility
- Easy to use calendar viewing modes including by day or week
- View and modify schedules by selecting a zone or by selecting the schedule from the calendar

ZONE STATUS/ CONTROL VIA FLOOR PLANS

- Import floor plan images in multiple file formats
- Create/modify/delete zones on floor plans
- View zones status (e.g. on/off state, occupied unoccupied state) using color coding and easy to differentiate status borders for “color blind” users

ENERGY DASHBOARD

- Easy to read graphical view of lighting energy usage and costs for a building, area or zone
- View energy data in daily, weekly, monthly, yearly or custom date ranges
- Use insights to decrease lighting system energy usage and decrease operational costs

INTEGRATION INTERFACES

- Embedded field configurable BACnet IP client
- Enables integration of NX Lighting Controls System with Building Management Systems (BMS)
- Configure multiple demand response levels for OpenADR 2.0a/2.0b integration

Standalone Controls

Broad selection of devices to meet your project needs

OMNI CEILING MOUNT OCCUPANCY SENSOR

- PIR, Ultrasonic & Dual Technology options
- Proprietary IntelliDAPT® Technology
- 500 – 2000 sqft coverage
- Line and low-voltage versions

LIGHTOWL WALL MOUNT OCCUPANCY SENSOR

- PIR, Ultrasonic & Dual Technology options
- Proprietary IntelliDAPT Technology
- 450 – 1600 sqft coverage
- Wide View, High Bay and Outdoor versions

LIGHTHAWK WALL SWITCH OCCUPANCY SENSOR

- PIR, Ultrasonic & Dual Tech Options
- Proprietary IntelliDAPT Technology
- 400 – 1000 sqft coverage
- Single & Dual Circuit Control
- RhinoTuff vandal resistant lens
- Line and low-voltage versions

NX CONNECT

- Simple room-based wireless controls programmed from the NX Connect mobile app
- In-Fixture wireless sensor options
- Single, dual, or three group wireless room controllers
- Battery Operated wireless ceiling mount occupancy and daylight sensor
- Battery Operated wireless switches and a self-powered wireless rocker switch

EMERGENCY DEVICES

- Automatic Load Control Relays
- Dual Voltage, 120V or 277V operation
- Provision for remote test button or fire alarm interface
- UL1008 Branch Circuit Transfer Relay
- Works with both inverter and generator systems
- Attractive Flush Mount Emergency Remote Test Button
- Low Voltage Class 2 Device

DAYLIGHT SENSORS

- Open Loop and Closed Loop photo sensors
- Foot-candle range: 3 – 6,000 fc
- Indoor and outdoor versions
- Low-profile design

WASP FIXTURE MOUNT SENSOR

- On/Off Control & 0-10V Dimming
- Integrated photocell for daylight harvesting applications
- Lens options for Low to High Bay applications
- Available in surface mount and end mount options
- Line and low-voltage versions

BLUETOOTH WASP FIXTURE MOUNT SENSOR

- On/Off Control & 0-10V Dimming
- Bluetooth programming via NX Lighting Controls App
- Tri-level set points
- IntelliSCOPE™ for real-time occupancy data
- Integrated photocell for daylight harvesting applications
- Multiple Lens Options for Low to High Bay Applications
- Line and low-voltage versions

BLUETOOTH SMP FIXTURE MOUNT SENSOR

- 0-10V dimming with dim-to-off driver
- Bluetooth programming via NX Lighting Controls App
- High and Low mount sensor options
- Multiple form factors and coverage patterns
- IntelliSCOPE™ for real-time occupancy data
- Photocell for daylight harvesting applications

CX LIGHTING CONTROLS PANEL

- Compact single enclosure with multiple size offerings for flexible and cost-effective installation
- Astronomical and real time clock for scheduling
- LCD user interface with keypad for easy and intuitive programming
- Allows for connection of low voltage devices directly to panel without any ancillary parts

WALLBOX DIMMERS

- Standalone Switch
- Full Range dimming
- Separate On/Off
- Single & 3-Way
- 120/277V Dimming Options

LOW VOLTAGE SWITCHES

- Standalone Switch
- On/Off and Dimming Versions
- 1-4 Button options
- Latching & Momentary options
- 24 VDC

Energy Savings Strategy & Code

Code Compliance at Every Level of Scalability

From a single standalone room or luminaire solution to a complete networked building approach, NX can maximize energy savings and meet or exceed today’s energy code requirements.

HIGH END TRIM

An artificial maximum light output set below actual maximum light output for each space

LOCAL CONTROLS

Manual lighting controls that control all the lights in that space and requires human intervention

MULTI-LEVEL CONTROL

Providing additional light levels in a space beyond Full ON and Full OFF

PLUG LOAD CONTROL

Automatically turns off designated receptacles in response to all occupants leaving the space or time of day

SCHEDULING

Controls light levels based on facility schedule

ASTRONOMICAL TIME CLOCK

Controls light levels based on sunrise/sunset and project location

SETBACK

Automatically turns lights down to a reduced level after all occupants leave the area

CONTINUOUS DAYLIGHTING

Automatically turns lights down to a reduced level based on the amount of daylight present in a space

DAYLIGHT OFF

Automatically turns the lights off based on the amount of daylight

DEMAND RESPONSE

A defined temporary reduction of lighting load or load shedding in response to a request from an energy authority such as a utility or regional transmission operator

BMS INTEGRATION

The data exchange for control and monitoring from a facilities Building Management System or Energy Management System using a common protocol such as BACnet™

FULL OFF

Automatically turns the lights off within a set period of time after all occupants leave the space

PARTIAL ON

Automatically turns lights on to a reduced level between full on and full off when occupants enter the space

PARTIAL OFF

Automatically turns lights down to a reduced level between full on and full off after all occupants leave the space

Phone and Remote Support

While it is our goal to provide you with intelligent, simple and scalable control solutions, customer experience level and project complexity may necessitate additional support during the design development, construction and post-occupancy stages of a project. The support team is available for consultation to evaluate multiple control scenarios to identify the ideal lighting control device or system to meet energy code requirement and customer criteria. Additionally, our team of friendly and experienced professionals is enabled to assist on-site personnel, such as installation contractors, third party integrators, certified field technicians and facilities personnel, to quickly resolve issues and provide additional support.

Warranty

Current provides a 5-year limited warranty for LED luminaires and Lighting Controls devices.

On-site Support

Current offers on-site support service to ensure your project goes smoothly. While Current products are designed with simplicity in mind, some projects may benefit from a Field Service Engineer to perform an on-site pre-installation walk-through, after-hours and remote startup assistance, occupant training, sensor tuning, preset programming and other pre/post-occupancy services.

Design Services

Our team of lighting control system design professionals are available to provide sensor layouts, networked system design services and third party integration support for new and retrofit projects. Our goal is to provide you with on-time and accurate delivery of design deliverables optimized for your specific application, compliant with local building codes and project specifications.

The Institute

Classroom Education

Current offers cutting edge educational opportunities at Institute facilities across the United States. Our headquarters, located in Greenville, SC houses one of the industries largest training facilities with over 25,000 square-feet and is engineered to present a total solutions approach to your lighting and controls challenges.

Additionally, we have dedicated Institute facilities in North Carolina and Texas as well as Current facility classrooms for in-person instruction across the United States.

Virtual Education

Current’s virtual education opportunities cover many facets of the lighting and controls industry including fundamentals, trends, technology, and product solutions. In addition, we can provide accredited continuing education (CEU) modules to help you maintain your certifications.

Engage with us in a way that’s best for you!

- An online university with modules designed for self pace individual learning consumed on-demand.
- Live (private) instructor-led training private events for individuals within your own organization designed specifically for your needs.
- Live (public) instructor led training public events highlighting new technologies, continuing education, and lighting trends.

NX IN-FIXTURE CABLES		
NXCBL-P-10	NX mini-Smart Port to Female RJ45 Plenum Cable, 10” length	Gray
NXCBL-P2-12	NX mini-Smart Port to Dual RJ45 Plenum Cable, 12” length	Gray
CAT5 SYSTEM CABLES		
CAT5-3IN-OR-PLENUM	CAT5 Cable, Plenum Rated, 3IN	Orange
CAT5-3F-OR-PLENUM	CAT5 Cable, Plenum Rated, 3F	Orange
CAT5-10F-OR-PLENUM	CAT5 Cable, Plenum Rated, 10F	Orange
CAT5-25F-OR-PLENUM	CAT5 Cable, Plenum Rated, 25F	Orange
CAT5-50F-OR-PLENUM	CAT5 Cable, Plenum Rated, 50F	Orange
CAT5-100F-OR-PLENUM	CAT5 Cable, Plenum Rated, 100F	Orange

Product Catalog

	NX Integrated Control Options for Indoor Luminaires Ordering Logic and Description		Control Option Functionality							Control Option Components		
			Networkable	Grouping	Scheduling	Occupancy / Motion	Daylight Harvesting	0-10V Dimming	On/Off Control			Bluetooth® App Programming
NX Wireless	NXW	NX Networked Wireless Radio Module NXRM2 and Bluetooth Programming, without Sensor	✓	✓	✓	–	–	✓	✓	✓		NXRM2-H
	NXWSM	NX Networked Wireless Enabled Integral NXSMP2-SMI PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXSMP2-SMI
	NXWRM	NX Networked Wireless Enabled Integral NXSMP2-LMI PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXSMP2-LMI
	NXWOM	NX Networked Wireless Enabled Integral NXSMP2-OMNI PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXSMP2-OMNI
	NXWLM	NX Networked Wireless Enabled Integral NXSMP2-LMO PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXSMP2-LMO
	NXWHM	NX Networked Wireless Enabled Integral NXSMP2-HMO PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXSMP2-HMO
NX Wired	NXE	NX Wired Dual RJ45 SmartPORTS, without Sensor	✓	✓	✓	–	–	✓	✓	✓		NXDSP
	NXESM	NX Wired Dual RJ45 SmartPORTS and Integral NXSMP2-SMI PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXDSP NXSMP2-SMI
	NXERM	NX Wired Dual RJ45 SmartPORTS and Integral NXSMP2-LMI PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXDSP NXSMP2-LMI
	NXEOM	NX Wired Dual RJ45 SmartPORTS and Integral NXSMP2-OMNI PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXDSP NXSMP2-OMNI
	NXELM	NX Wired Dual RJ45 SmartPORTS and Integral NXSMP2-LMO PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXDSP NXSMP2-LMO
	NXEHM	NX Wired Dual RJ45 SmartPORTS and Integral NXSMP2-HMO PIR Occupancy Sensor with Automatic Dimming Photocell and Bluetooth® Programming	✓	✓	✓	✓	✓	✓	✓	✓		NXDSP NXSMP2-HMO
